El Jadida, 5th May 2021

Mr. Ali khalil , The director of human ressources  
OCP Group , El Jadida

Dear Sir,

Currently, in the second year of engineering, Artificial Intelligence sector, at ENSIAS (The national school of computer science), I am looking for an internship of 1 month to 2 months for the summer 2021 taking place in the period from July 5, 2021, to September 3, 2021, in one of the following disciplines : Artificial Intelligence / Data Science / Machine Learning / Deep Learning.

This internship is of great importance for my training, it will allow me to consolidate my theoretical knowledge and put it into practice within a company.

I read in lots of articles that the OCP group is in the process of opting for artificial intelligence in its different activities to be able to follow this new digital trend which certainly has a very promising future.

I think, I have all the required qualities, the ambition and the motivation to accomplish the missions that you are going to entrust to me.

You will find attached all the documents relating to my internship request.

If you want to know any other information about me, you can contact me at any time.

Looking forward to your response, please receive my best regards, Sir.
